**Support to comment from Acconeer AB
with ID109201878526039 /
Proceeding OET 21-264**

OSM Group is a Development & Manufacturing Partner for Electronics & Engineered Soft goods with office in China, Hong Kong, Philippines, Sweden and USA.

OSM manufactures products marketed and sold by other companies in the United States. Some products manufactured by OSM either already today use a 60 GHz pulse radar or will in the future. OSM therefore has a strong interest in the FCC adopting rules that will allow for these radar operations in products sold on the U.S. market, to the benefit of U.S. consumers.

OSM supports the proposals for new rules that were made by Acconeer in its comments filed in the proceeding (ET Docket No. 21-264). FCC rules consistent with the ETSI standards will allow U.S. companies an equal opportunity and for OSM, as a manufacturer, greater certainty in conforming to rules and regulations when producing innovative radar technologies to address market needs.

It is important that the Commission consider the impact of proposed technical rules on the different radar technologies so that the Commission should not inadvertently provide a competitive advantage to one specific radar technology, but rather let the market decide what is the best fit.
